Don't replace your hardware. Elevate it.

Transform your network

ePMP Elevate software solution allows fixed wireless broadband networks to gain the powerful signature capabilities of Cambium Networks' ePMP platform, including frequency reuse enabled by GPS Synchronization and Smart Beamforming, even on non-Cambium 802.11n-based hardware.

The next level of network migration

Saving the cost and time of a total network replacement, an operator simply installs an ePMP Access Point and loads ePMP Elevate software onto their deployed subscriber modules.

Protected investment

With the upgraded features of ePMP Elevate, the life of existing infrastructure is dramatically extended to support revenue-generating applications for years to come.

Streamlined operations

ePMP Elevate networks can be managed by cnMaestro™, the cloud-based or on-premise platform that provides end-to-end management, device onboarding, and maintenance support for wireless broadband networks from a single, easy-to-use interface.

Managing all your Wireless Devices Effortlessly

See a view from the clouds

With ease of use and vast scalability, cnMaestro has a full set of features targeted to cloud manage Cambium devices in a simple way.
